

YUMNA KASHIF

Computer Science Student | Aspiring Software / Web Developer

Islamabad, Pakistan | +92 332 6182474 | yumnahkashif81@gmail.com | [github.com/\[your-username\]](#) | [linkedin.com/in/\[your-profile\]](#)

PROFILE

Computer Science undergraduate (COMSATS University Islamabad) with hands-on project experience across Python, Java, and database-driven applications, including an AI-based expert system and a full-stack MongoDB application. Comfortable managing projects independently, from an e-commerce store built and optimized on WooCommerce to a rule-based diagnostic system built in Prolog. Currently expanding into the MERN stack (React/Node.js) and seeking a software or web development internship to apply and grow these skills in a team setting.

EDUCATION

COMSATS University Islamabad — BS Computer Science

September 2024 – September 2028 (Expected)

Punjab College — FSc Pre-Medical

2021 – 2022

Relevant Coursework: Artificial Intelligence, Database Systems (MongoDB), Information Security, E-Commerce, Object-Oriented Programming

TECHNICAL SKILLS

Languages: Python, Java, C++, HTML/CSS, Prolog

Databases & Web: MongoDB (Atlas, PyMongo), WordPress, WooCommerce, Shopify

Tools: Git/GitHub, Proteus (circuit simulation), Streamlit, Microsoft Office

Currently Learning: JavaScript, React.js, Node.js (MERN stack)

Languages Spoken: Urdu (Native), English (Advanced), Punjabi

PROJECTS

AgriExpert-PK — AI Crop Disease Diagnosis System | Python, SWI-Prolog

- Built a rule-based expert system using forward/backward chaining and unification to diagnose crop diseases from symptom input
- Implemented certainty-factor logic to rank diagnoses by confidence and an OLS linear regression model to estimate economic crop damage

University Transport Management System | Python, MongoDB Atlas, PyMongo, Streamlit

- Developed a full-stack transport tracking application as part of a team, using MongoDB aggregation pipelines and indexing for efficient querying
- Designed the schema around sharding and ACID considerations covered in coursework, with a Streamlit front end for live data views

PixelCraft — WooCommerce Online Store | WordPress, WooCommerce, Yoast SEO

- Built and independently manage a live e-commerce storefront, handling setup, product listings, and store configuration end-to-end
- Conducted a full SEO audit and applied on-page fixes to improve search visibility and site structure

Hospital Patient Management System | Python

- Built a desktop application to manage patient records, appointments, and basic reporting

Online Food Delivery System | Java

- Designed an OOP-based ordering system modeling restaurants, menus, and order workflows

Traffic Light Controlling System | Proteus

- Simulated a microcontroller-based traffic light circuit to model timed signal switching logic

LEADERSHIP & VOLUNTEER EXPERIENCE

- Volunteer Member, IEEE** (Institute of Electrical and Electronics Engineers) — supported chapter events and activities
- Language Interpreter (Volunteer)** — provided interpretation support for community events
